

Chore Management App

<https://www.youtube.com/watch?v=5RpUmDEsn1k>

As an admin on this app, I will want to be able to create **chores**.

As an admin on this app, I want to be able to manage a **roster of people**.

As an admin on this app, I want an easy way to control, in the roster, who is eligible for what chore.

As an admin on this app, I want to be able to randomly assign chores in a fair way that respects people who have already done **chores in that category**, and people who may have **exceptions**.

As an admin on this app, I want to be able to manually override an **assignment** if necessary.

As an admin on this app, I want to be able to give **descriptions** for the various tasks of each chore, and assign people to the **subtasks**.

As a regular user on this app, I want to see what chores I have and will have for the next **month**.

As a regular user on this app, I want to be able to submit **appeal requests**.

As a regular user on this app, I want to be able to **propose a price** for someone else to take this chore.
